

GEORGE MEANY MEMORIAL ARCHIVES
AUDIOTAPE COLLECTION
OVERVIEW

Dates: The bulk of the material is between 1953 and 1983. The collection contains some miscellaneous material, mostly speeches of CIO and AFL leaders, before that date. The collection contains few tapes after 1983.

Provenance: Most of the tapes were accessioned from the "tape closet" of the Information Department in 1985. During the 1950s, 60s and 70s, the AFL-CIO did their own sound recordings within the old Public Relations and Information Department. Sid Breckner was the recording engineer for the AFL-CIO throughout much of this period. He retired in ?. In 1982 the Labor Institute for Public Affairs [LIPA] was formed and built a quality video studio in the AFL-CIO building. Since that time much more of the AFL-CIO's media outreach had been done through video. The lack of audio tapes after that point in this collection may signify little radio work was being done, or, that the material has yet to be moved to the archives

Collection Size: 121 boxes of inventoried tapes and 22 boxes uninventoried. The total number of tapes in the processed boxes is 4569, and in the unprocessed collection approximately 1200.

Format: The majority of the tapes are reel to reel. By the early 1970s some of the tapes are the standard cassette format. Only a few of the tapes are labeled "copies" or "master" and no such distinction was included in the data base at this time. There are, infrequently, multiple copies of some individual tapes.

Note on the data entry procedures employed: This survey was a quick preliminary one to evaluate the broad nature of the holdings, and identify potential storage and damage issues. For single tapes of press conferences or speeches the main speaker and topic were entered in the computer. However, A complete listing of the content of each tape in large multi-tape series was not done at this time. Thus conventions and conferences that may themselves be an entire box of over 30 tapes have only a single entry under the title of the event. For example, the computer listing for the 1979 AFL-CIO Convention would be "1979 AFL-CIO Constitutional Convention" with 20 tapes noted in the relevant data field. The complete list of speakers and issues are on the tape box itself. Also, supplementing the computer printout, some boxes had all their individual tape boxes identifications xeroxed. These copies can be used as a additional finding aid.

Printout: One printout is by box, with the tapes sorted and arranged by date within the box. The contents of a individual box is generally within the same time frame, with some exceptions. The second printout is with the individual tapes sorted by date irrespective of box. For searching for items using the computer please consult archives staff.
